PILGRIM LASSIES SWAMP BUTLER

The Plymouth girls completely overwhelmed the weak Butler team 29-12 in a slow game here last Friday night. From the start of the game it was only a question of how many points the P. H. S. team could roll up in the half-hour of play...

PLYMOUTH-39 G. F. T. Moore, F. 6 2 14 Sourin, F. 1 0 2 Bachrach, F. 9 3 21 Pugh, C. 0 0 0 Hackett, G. 0 0 0 Aslakson, G. 0 0 0

PILGRIMS COLLECT

Friday, 16.—Butler! Ah! Nothing to it, but we'll excuse that as this is their first year at basketball. They were literally swamped 50-9.

The game itself was one basket after another until the Butler quintet looked positively sick. The 2nd team started the game and held Butler on even terms during the first quarter. Then an all senior team took the floor and ran up twenty points to one...

OLD RIVALS CONQUERED Saturday, 17.—Before the game Col. Bachrach was interviewed and made the statement that "if we beat Ontario we're all set." The Pilgrims are set. Ontario was "knocked off" 22-15. The game was pleasantly fast from a spectator's viewpoint. It started out rather slow on the end of one quarter it stood 2-2 Plymouth. The half time showed P. H. S. 9, O. H. S. 12.

After a fast and furious third quarter the score board showed a 16-10 tie. From then on the burden quieted began to click and they rapidly ran up a safe margin to have the game well in hand at the final gun.

For the second time this year Briggs was ejected from the game for unnecessary roughness. This is the tenth win in twelve starts for the Jenkins crew. The always tough Shiloh quint will be met on Thursday of this week and a real battle is expected if past scores are to be believed.

One Solution for State Institutions Huron County Court News

"Millions of dollars are being spent every year to care for the feeble-minded and epileptics of Ohio after they are born, but practically nothing has been done to prevent these people from increasing in number. The Ohio Race Betterment Association endorses the forthcoming bill for the sterilization of feeble-minded and epileptic persons as a forward step in the solution of the problem..."

"Our state institutions are now filled to overflowing and places a burden of at least \$2,000,000 on the taxpayer's shoulders every year, not to mention the untold suffering which generations still unborn would have to pay if state care is not taken at once to handle this problem." Fisher said.

"When one thinks that if only 10 per cent of our feeble-minded were sterilized, the three million dollars a year it means a kindness to those who would not wish to be born, and a better society in which our children will live, Fisher concludes..."

## Where Do The Stories Start?

Most every day this week we've had some person to pop the question to us about the purity of the water supply of Plymouth. And why should we know. Especially when there are so many rumors to select from. We know of at least three different stories, and everyone of them are entirely different, concerning the wells that have been drilled by the village, the individual wells of the homes, and the present supply of water that is used by the town. Some are o.k. and some are contaminated, according to the rumors, and as far as we know they are only rumors.

However, there is no doubt some truth exists in the fact that there is impure water somewhere in Plymouth, but we cannot say from whence it comes. But according to the stories circulated one should be able to make a choice. We do know that the two wells brought in by the village have certain indications that are fit to be used for household consumption. And we are also certain that reports emanating from other sources try to disclaim the whole water situation.

When certain parties try to halt or put a stop to an improvement that is as badly needed as water for Plymouth, then the public can figure they hear a lot of plain talk. We are assured that Plymouth will have pure water, and we want our readers to know that this information is reliable, and that they can depend on the source of supply as well as purity. So lay aside all the stories you hear about the water situation, and adopt a policy of watchful waiting and you'll see water in Plymouth.

### THE TREAT TO THE RAILROADS

Oliver Wendell Holmes wrote of "the wonderful one boss shay":

Little all of all we value here

Makes on the morn of its hundredth year

Without both looking and feeling queer.

Railroad transportation in the United States has just been celebrating the hundredth anniversary of its birth and it's "looking and feeling queer." New rivals in the field of transportation have risen to plague it. Football is familiar with the triple threat, the youngster who can run with the ball, kick it or pass it with equal skill. There is a quadruple threat against the railroads: transportation by air, by waterways, by improved roads and, last but by no means least, by pipe line.

So grave is the threat that the Association of Railroad executives plan to seek legislation compelling the oil companies to divert themselves of a \$400,000,000 investment in pipe lines. The railroads talk also of asking increased government regulation of trucks and buses.

A grave situation—one which affects and concerns not merely the railroads and the oil companies but every shipper and every traveler and every consumer of goods in these United States and that means the whole 120,000,000 odd of us including men, women, and babies.

To the 325,000 business men who read this magazine and who are more gravely concerned than any other group we commend the article by Interstate Commerce Commissioner Porter beginning on page 20 of this issue—Nation's Business.

### HIGHER TAXES AND UNEMPLOYMENT

The president of New York's Board of Aldermen spoke in meeting the other day. He thought it outrageous that "reproducing grand pianos" should be bought for public schools at \$2,086 each. On the same day New York City's Board of Estimate added \$5,000,000 to its budget for 1931 of which \$1,000,000 was specifically for the relief of unemployment.

The increase means that the rate of taxation on every \$100 assessed valuation will be \$2.67 instead of \$2.64. What's three cents on a hundred? On a house assessed at \$10,000 it's \$3.00. But if part of it goes for the relief of the unemployed, the house owner is going to spend \$3.00 less on shoes or sugar or something else that keeps men employed.

A country has about hit bottom when an honest man is the only one who doesn't know how to keep out of jail—New Haven Register.

A doctor recommends butter as a cure for lumbago. You just give your self a pat on the back, of course.—The Humorist.

Henry Ford contradicts himself. He says woman's place is in the home, and then does all in his power to keep her out of it.—Anderson (Ind.) Herald.

A fellow has a wide range of possibilities now to select from: He can be land poor, stock-market poor, factory poor, or wheat poor.—Detroit News.

A talking picture containing only women characters is to be filmed in Hollywood. Some may say that scarcely anything could be more appropriate than that.—Pittsburgh Post-Gazette.

Experts say that women's feet are two sizes larger than they were twenty years ago. From trying to fit men's shoes.—Jersey City Journal.

## COUNTY BOARD GETS PETITIONS

Contain 900 Names Asking Tax Rate Reduction.

NORWALK, Jan. 21—Petitions circulated in all but four townships of the county, have been submitted to the commissioners, in which a reduction of taxes is asked. The townships are Townsend, Richmond, Newfield and Norwalk. There was also a general petition submitted by the Huron-co Tax League. Total number of signatures was 900.

The most drastic action was asked in the petitions circulated in Sherman, Lyme and Peruta. These pro-

positions advocated the abolishment of the offices of county health board, the farm bureau, visiting teacher, county farm agent, home demonstration agent and dog warden.

### Agricultural Talks Sent By WLW Are Being Heard In The Faraway Places

Dr. Ray Fife broadcast over the Ohio State Department of Education Radio School recently. His talk dealt with Federal Aid in Education as applying to agriculture. His talk created favorable comments.  
An interesting letter from Honorable H. E. Ward, Deputy Minister of Labour, Ottawa, Canada. Dr. Ward in his letter to Fife stated that Canada administers Federal aid in technical education and he was very interested in the plan used in the United States.

Another interesting letter was received from Carl Colvin, former state supervisor of vocational agriculture in Illinois, who is now director of all agricultural activities in Haiti, including college and high school agricultural education, experimental and research work. An excerpt from his letter shows the contrast of climate with the universality of the radio. In his letter to Fife, Colvin said, "While listening to the music from WLW being wafted across 2000 miles of land and water, with a tropical moon adding a touch of Paradise you can imagine our surprise and added joy when the announcer said: 'Dr. Ray Fife will now speak on Federal Aid to Education.' We did not miss a word of your discourse. To hear your talk reminded us of old times. The radio is a marvelous instrument and brings our little mountain home in touch with the whole world from Java to Columbus."

### More Farm Boys and Farmers Attending The Vocational Ag Classes

That farmers and their sons are making a more determined effort to add to their industrial information than ever before is indicated by reports from 297 high schools in Ohio offering vocational agriculture work. These reports show a total enrollment of 5831 boys in all day work which represents a ten per cent increase over last year's figure. An even greater increase in the number of attending part-time and evening classes in which 3000 students were enrolled last year, is shown by preliminary reports of such courses for older farm boys and adult farmers.

Part of the increased total enrollment in high school agriculture classes is due to the fact that the work is offered in 13 more schools this year than last but the reports also show an increase in the average number of all day pupils per teacher from 28 to 30.

In addition to their high school classes, 85 per cent of the agriculture teachers of the state have already started courses or are organizing classes for part-time and evening students according to reports received by State Supervisor Ray Fife of the State Department of Education. Sixty six per cent of the teachers offered courses last year to similar groups of farmers who attended ten or more evening sessions to study such subjects as farm management, marketing, soils and fertilizers, dairying, swine production, poultry production, tractors, farm machinery and farm shop.

All students in vocational agriculture classes which are supported partly by State and Federal funds and partly by local funds, carry home projects or other supervised farm practice work under the direction of the local vocational agriculture teacher.

### Death Threatens Woman To Poor to Eploy Doctor

**WILLARD, Jan. 21**—Death tonight threatened to take the life of Mrs. Verna Vannola as a sacrifice to the destitution and poverty which has prevailed in some sections of the marshlands south of here.  
Mrs. Vannola is in Municipal Hospital where she was taken after having been removed from her home south of this community.  
According to other members of the family, Mrs. Vannola had been critically ill for some time but there was no money with which to employ a physician. Household remedies failed and finally, neighbors notified Willard residents, who investigated the case.  
The Vannolas are native Kentuckians.

## Celebrated Humorist Sure He'll Reach Century Mark

COLORFUL WILL ROGERS' LATEST STARRING VEHICLE, "LIGHTNIN'" FOR FOX MOVISTONE, SLATED FOR CASTAMBA THEATRE'S SCREEN THURSDAY, FOR 3 DAYS WITH MATINEE SATURDAY AT 2:30

"I expect to live a hundred years," recently declared Will Rogers, internationally known wit, humorist and philosopher. "The secret of longevity is happiness and I'm the happiest man in the world, at least the happiest in the Democratic party."

"I have my health, a family of the right size, a good home and enough money to keep the world publicized well from the door. Besides this, I don't worry. Worry kills more people than booleggers. Reminds me of a story I heard recently."

"A motion picture employee, who was much given to fretting over trivial matters as well as bigger ones, meeting a friend, announced that he was through worrying. Nothing could make him stew, no matter what it was."

"How come?" asked the friend; "you used to worry continuously."

"Well, I've hired a professional worrier; he does all my worrying."

"Something new, isn't it? How much do you have to pay him?"

"Well, that's the first thing he's got to work about."

Rogers portrays the role of "Lightnin' Bill Jones" in "Lightnin'", Fox Movietone comedy drama, adapted from John Golden's tremendously successful stage play, which comes to the Castamba theatre, Shelby, Thursday for a run of three days. Bill is lazy, friendly, genial and loquacious, especially when he has been indulging in drink. He is whimsical and tells some of the biggest lies ever heard, his imagination running riot when he is properly "fueled."

But Bill is "nobody's fool" and turns out to be the hero before the picture reaches its climax.

Louise Dressler, popular on both the stage and screen, enacts the role of Rogers' wife in this production, and Helen Hohan, youngest daughter of George M. Cohan, appears as their daughter. Others in the large cast are Joel McCrea, Frank Campana, Sharon Lynn, Ruth Warren, J. M. Kerrigan, Joyce Compton and Rex Bell.

A score or more of gorgeously gowned divorces lead atmosphere to the production and many of them have speaking lines.

Henry King, one of the best directors of all talking pictures, transferred this epic to the screen after the adaptation and dialog had been prepared by Sylvia Lovien and S. N. Behrman.

## COUNTY RED CROSS GIVEN QUOTA OF \$5000

The Richland County Chapter of the American Red Cross has received \$170 for the \$10,000,600 drought relief campaign sponsored by President Hoover. The amount received leaves \$4,830 yet to be taken in. As yet the Richland chapter has never failed to reach the quota set. Contributions are to be taken to the basement of the Mansfield Public Library, on West Third street. No solicitation of funds will be made.

## Hatchery Eggs and Their Production

To produce strong, healthy chicks it is necessary to have the breeders in good condition. A healthy breeding flock is one that has thrived through molt, has bright red combs and is in good condition. There are three essential requirements to produce good hatchable eggs—green feed, sunlight and milk.

The requirement for a good green feed is that it grew in the sunlight and carries a green color. About the only winter green feed for breeders is alfalfa hay. Later in the season, if the birds are out on grass range, they will not need alfalfa.

Sanitization is very essential to produce good hatcheries. During the winter when the days are short and sunlight is scarce, cod liver oil is the only substitute. Cod liver oil is a very important vitamin for breeders. It is found in Milk, in some form, is necessary to produce good healthy chicks. It is interesting to know that the combination of alfalfa, milk and cod liver oil will produce healthy chicks in winter just as well as the natural sunlight, green grass and milk will produce them in the spring.

## Cuckoo Stars in Brand New Film

For screamingly funny situations, Radio Pictures farce, "Hook, Line and Sinker," co-starring Bert Wheeler and Robert Woolsey at the Temple Theatre at Willard, is the season's masterpiece.

It is a "straight" comedy even funnier than "The Cuckoos," and "Half Shot at Sunrise."

It hits these comedy kings into a class by themselves specialists in comedy, both high and low.

They are at their best at clowning, and they are also at their best when genuine dramatic artistry is required.

The story starts with a roar and gains in momentum, which never slackens speed nor volume. The boys start out as insurance salesmen, politely steal a whole railroad train—put in on the affairs of a beautiful girl—face over the hotel she has inherited... fill it with society dowagers and their jewels... and then, when publicity brings all the crooks in creation into the hotel, the plot begins in earnest.

## Wife, Gas, Scare Man in Dead of Night

"Overcome by stomach gas in the dead of night, I scared my husband badly. He got Adferka and it ended the gas."—Mrs M. Owen.

Adferka relieves stomach gas in TEN minutes! Acts on BOTH upper and lower bowel, removing old poisonous waste you never knew there. Don't fool with medicine which cleans only PART of bowels, but let Adferka give stomach and bowels a REAL cleaning and get rid of all gas!—Karl F. Webber, Druggist.

### RICHLAND COUNTY LEADS IN WOODLAND

Richland county with a total of 46 acres and 1,450 acres in woodland, leads all other townships in woodland demonstration. Ashabula county follows with 1,425 acres, with Geauga, Trumbull and Wayne counties next.

To be eligible in the demonstrations class a farmer must use a tract of land for growing timber only. Pasture land can not be ranked as woodland. If maple trees are growing in the area, the owner may tap them for sugar water and sell the timber.

A farmer in Huron county has 20 acres of woodland and since 1910 has protected his woods from cattle and practiced selective cutting. During the last 10 years this man has sold over \$1000 worth of timber and has left standing the larger trees of saw log size. Early in 1930 he sold \$400 worth of sugar maple, beech, tulip poplar, white oak and black walnut, which he used to pay his taxes and interest on farm investments.

Milk contains all of the six vitamins.

### PETITION FILED TO BENEFIT CREDITORS

Two petitions were filed in Probate court Saturday by C. E. Morris, assignee for the benefit of the creditors of W. H. and Allie Pettit, as of Isaac Bevier, in which Morris asked the courts leave to sell certain real estate in Plymouth township for the purpose of paying the costs of assignment of the three persons, and for satisfying other liens against the assignee, C. J. Anderson represents Morris.

### Baby Chick Season Open at Hatchery

Baby chick season opens at Shelby Hatchery, Shelby, Ohio, with the arrangement of chicks last week. Carl Daugherty, proprietor, states that the hatchery, located at the corner of Whitney and Washington, will be open daily from now on with chicks hatching each week.

A beautiful new catalog has been prepared for distribution, which includes in detail, Carl Daugherty's 5 Special Production Breeds, N. C. White Plymouth Rocks, Barred Plymouth Rocks and White Wyandottes. These are mated with pedigreed males with records from 200-321 eggs in the different breeds.

You will enjoy reading this new catalog. You can secure a copy at the hatchery, free of charge, or call Frederick Blackford, Tel. No. 2A-78, who has been associated with Shelby Hatchery during previous hatching seasons, and who is now representing this field for the Plymouth district.

### Notice to Our Patrons

We will handle Baby Chicks and take care of our chick trade again this season, giving the same good service which we have always endeavored to give in past years.

At present, we are located at number 20 Fortner street, but we are contemplating installing Electric Machines and in case we do, we will probably be located up town later in the season.

Our prices at the opening of the season will be \$11.00 per hundred for all Light Breeds and \$13.00 per hundred for the Heavy Breeds.

Kindly place your order with our one week in advance of date wanted.

### TAX LEAGUE

they can be corrected we advocate a program of rigid economy of their management in this county. We demand a radical cut in the overhead cost and excessive salaries and number of assistants in the office of county superintendent of schools under the county board of education, when there are schools in this county that are barely able to keep their schools but eight months in the year. We advocate a new system of school tax collection where the tax is collected uniformly and equally all over the state, and distributed by the state to all school districts per capita school population, allowing of course for transportation facilities in districts remote, and other exigencies, giving every child in the state of Ohio an equal opportunity for education. The management and administration of our schools to be left at home in our local school districts by local boards of education believing in most instances all school districts should be large enough to have their own high schools and superintendent and do away with excessive duplication of supervision and overhead. Unanimously adopted.

Abolish County Agent  
We favor the abolition of the present system of county agents and home demonstration agents as their duties are now laid out applied to the farms of our counties. They do not work where they are needed, and where they are needed they do not go.

Settlement was about four to five to abolish these offices. Ballers this about use among all farmers of the county.

For keeping court house open Saturday afternoon for business, also advocated by Farm Bureau.

Favor change in dog tax law abolished when such also making dog fund standard and losses from dog depredations paid from this and balance paid back to counties according to dog population.
