Dayton Danner Dies Suddenly

LAST RITES TO BE HELD FOR WELL-KNOWN CITIZEN THIS AFTERNOON.

This afternoon at 2 o'clock at the Presbyterian church, friends and relatives will gather to pay their last respects to one of Plymouth's best known and well-liked citizens, D. W. Danner, Rev. H. L. Bethel, pastor, will officiate and burial will be made in Greenlawn cemetery with arrangements in charge of the Miller-McQuay funeral home.

Mr. Danner passed away Monday evening at the family home on North street quite unexpectedly. He was the eldest child of Jeremiah S. and Susannah Archer Danner, and was born July 31, 1880 in Adams County, Indiana, near Wilshire, Ohio.

He was united in marriage to Adaline Hatch of Plymouth, O., January 3, 1894, at Plymouth, O., where they spent the six entire lives. To this happy union was born five children, Alta May, Earl Stewart, Millie Gertrude, Hazel Stone, and Florence Adelle, two of whom died in childhood.

For the first two decades of his married life he was a farmer in the vicinity of Plymouth. In 1903 he chose to become a rural mail carrier, serving in this capacity for twenty-six years, during which time he made a host of friends and acquaintances.

Shortly after their marriage they became united with the First Presbyterian church of Plymouth, where he was ordained as an elder of the church in 1901. He was active in this capacity for forty-two years, this being the greatest number of years served by any one member in the history of this church.

He is survived in death by two sisters, Mrs. I. A. Brown of Allen, Mich., and Mrs. Arilla (deceased) of Grand Rapids, Mich.; three daughters, Mrs. Harry Briggs, Mrs. C. O. Cramer, and Miss Florence Danner, all of Plymouth; eleven grandchildren; Mrs. Geo. Lentz of Denver, Colo.; Miss Lucille Briggs of Mansfield; Leroy D. Briggs, Whitney Briggs, LeRoy D. Briggs, Betty Briggs, Zantette Briggs, Margaret Briggs, Deryl R. Daugherty, Mrs. Keith Gooding and Dayton C. Cramer children are Mary Yvonne and Sandra Lentz of Denver, Colo.; Suzanne and Kathleen Daugherty, Carole Jane and Jean Briggs, Mary Ellen Briggs, Lenore Ann, Joanne and Francis Lee Briggs and Lanny Gooding of Plymouth.

His presence will be so sadly missed first of all in his home and church and in the community by his host of friends who were cheered by his ready wit and good nature. As state where he has lived and passed to his reward.

RICHARD MOORE SAFE

In a V-letter received this week by Mr. and Mrs. Clinton Moore, their son, PFC C. R. Moore writes that he is well, safe and while it was impossible to state where he is located, he has been enjoying the movies and entertainment that is provided in their camp.

This is the first letter received from Richard since Oct. 6, causing considerable anxiety to his parents. They had previously asked the Red Cross for help in obtaining word from him and the V-letter was more than welcome.

AW--G*Wan

"Every time an American worker loses, destroys, or mutilates his social security account card, it is, as well as much more, as it costs to provide 13 bullets to an American soldier," Mr. Sam F. Smith, Jr., manager of the Mansfield field office of the social security board said today. He asked that holders of social security cards safeguard them as a wartime conservation measure.

Nearly 2,000,000 duplicate account cards were issued by the social security board in the past 12 months, Mr. Smith said. They were issued to persons who had lost or destroyed the ones originally given them.

You ain't kidding are you Uncle Sam? If one little social security card will provide 13 bullets to an American soldier, can't help but wonder how many Japs are living today because of waste paper baskets is full to overflowing EVERY DAY with the vast amount of literature and propaganda sent out by various concerns all over the country. In fact we get so much stuff and junk, it is a real task to separate the good from the bad and oftentimes feel we certainly overlook an important announcement because we have to wade through so much before it can be relegated to its final resting place, the waste paper basket.

Now, if the hundreds of bureaus down in Washington would not send out so much useless stuff, a few hundred more million or billion bullets could be made to get rid of a few hundred or billion more useless stuff—the Japs and the Huns.

REMOVED HOME

Tommy Brown, son of Mr. and Mrs. L. E. Brown was removed Sunday from the Mansfield General hospital to his home, 1111 1/2 street. Tommy is recuperating from an appendectomy.

DOWN IN ALABAMA

Hank Watts sent a change of address this week from Atlanta, Ga. to "deah ole Alabam", where the red clay is 18 inches deep—and no kidding. The way out here is being written around, they would be able to meet the enemy in Russia or the hot sands of the desert.

Around the Square

(By Phineas Whittleseed)

LOOKS like Ohio's going on the old time schedule, which suits me swell. The \$64 question this week: "Where is Hitler?" And have you thought about your Income Tax? For 16 years, that day that passes brings us closer to Spring. But, where on earth is that "February Thaw"?

PAUL EICHELBERGER a friend of Lloyd Falor, is reported missing. Eichelberger and Falor entered the Navy together and remained in the service for 16 years. They travelled throughout the world together, long before Pearl Harbor, and shortly after the outbreak Falor's chum was reported missing. Lloyd is the son of Mr. and Mrs. R. H. Falor, and he has recently been promoted to chief petty officer in the navy.

OFFICIALS of the Erie County War Rationing Board has called attention to the regulations which prohibit the selling of coffee alone without food. If coffee is carried out in Plymouth there certainly would be some "heavy weights."

FACING A FARM all alone must have been the reason for H. S. Rhine disposing of his mighty fine farm on Route 98 this week. Mr. Rhine has farmed these acres for a long time, and his three boys would pitch in and help out—but since they've gone to the Service, it makes a different story when it comes to tilling the soil. And H. S. isn't as young as he used to be.

WANTING TO DO her part in helping to win Victory, Mrs. Paul (Betty) Root, has accepted a regular "thet-man's" job at the F-R-H plant. She started in this job by taking over the wheel of the pick-up delivery truck. It isn't any fun on this job, but she is determined to do her part. She thought it over very seriously before making her application. And by doing so, it helped solve the problem for plant officials for male truck drivers are really getting scarce. Betty is worried very much about what Paul will say or do—but it's a safe bet he won't do a lot about it—thousands of miles away!

REGULAR meals, plenty of good sleep and fresh air and sunshine certainly makes Jerry Ramsey Lindsay look like a picture! She gave her friends a very pleasant surprise this week when she and her husband came to town for a short visit.

DOG-GONE IT! With shoes now being rationed, even when they're clean off the Public Square. You lose two pounds of sole every time you walk across the cinders.

THERE'S a "clip-joint" being operated in Plymouth. Watch for further developments. It's going to be exposed one of these days.

I SURELY wish the President would cut my hair down to 48 per cent week—at half the price!

IF YOU really want to laugh go down to the Junior Class play tonight. From now on, it's going to be the real stuff—and it's a safe bet that there will be no prompting! ? ? ?

NO NEWS IS good news, and we believe Mr. and Mrs. Clint Moore will vouch for this, since they came to hear from their son, Richard since last October. The other day a letter came, written by Richard, stating that he is well and getting along fine. He's out in the Southwest Pacific. Anyway, we all feel better.

Mary Ellen—I've already made tea for you.

Mother—That's sweet of you. Did you find the tea strainer? Mary Ellen—No, I used the fly swatter.

Mother—You used the what? Mary Ellen—Oh, you don't need to worry, Mom, I used the old one.

William Miller Dies; Age 89

William J. Miller, 89, died on Monday morning at 2 o'clock at the home of his granddaughter, Mrs. Lincoln Washburn, two miles northwest of Greenview. He was born March 9, 1853 in Bloominggrove township where he spent nearly all his life. He was preceded in death by his wife, Clara Ellen Stanley Miller in 1902 and also two sons.

Surviving are one daughter, Mrs. Frances Seaman of Shiloh; twelve grand children and twenty great-grandchildren.

Funeral services were held on Wednesday afternoon at 2:30 at the Hines-Bender funeral home in Greenview. Rev. Johnson, pastor of the Church of Christ, officiated. Burial was in the Edw. Ward's Grove cemetery.

Mr. Miller was the last member of a family of seven children. He was a farmer all his life and active as long as his health permitted, but he never lost his interest in the farm life. In his early days he was a leader in corn husking and wood-cutting and until the late 1920s he took place here as a leader in many farm activities. He was known for his liberal contributions to the church and all its branches, and his P. M. truck is in need. A living Christian faith.

Mr. Spirk was one of four out of a half hundred whose high grades entailed him for this service. His duties are from 9 to 4 and seems to him like civilian life until he looks at his uniform.

Mrs. Joseph has an aunt and cousin living at Santa Ana, Calif., where Mr. Spirk is located and before he reached his appointed destination in December she had written her aunt telling her our music instructor would be there. She found a nice room for them across the street near her home, when Mrs. Spirk arrived. They spent Sunday in her home and joins the family at their church worship.

Mr. Spirk likes his work, but says, "Tell the Shiloh folks to write us."

Food Shortage and the Farmer

If we are to believe all we read and hear, the country will before long be facing a serious food shortage. It would appear that this is obvious. First, we are shipping great quantities of food to our soldiers, to our Allies, and to hungry friends wherever we can reach them without helping the enemy. Second, we have been drafting into the army more men from the farms than now appears to have been wise. Third, we have made work in the war effort so attractive that the farmer who has to work long hours, at comparatively low pay, just naturally can't resist.

Only a few months ago there was a battle going on in Washington during which the country was made to believe that the "villain of the piece" was the "selfish farmer" and that the "villain of the piece" was the farmer who was not willing to be pegged by law, or otherwise, "where they were at that time, so his 'cost of living' was remained fixed.

Well—labor wages have "slipped" in the number of hours, and it looks as though they will continue to "slip." There is already talk of raising the price on a number of commodities. But there doesn't seem to be any concrete plan for doing this. The farmer's predicament, except that he is going to be allowed to purchase more farm machinery, and the drafting of men scarce needed on the farms is going to be slackened.

Now a number of mathematical geologists are figuring some figures on how to avoid a food shortage in this country; but their sums don't seem to add up just right. They seem to have left the human equation out of their calculations. A

Submarine is Hitler's last Ace as Allies Forge Ahead In Production and Battle

SOMEWHERE IN THE ATLANTIC—Inky darkness has settled over the ocean.

The skipper stands by on the bridge. Below him he can hear the muffled clatter of the engines. The waves chop noisily against the ship's sides. In the hold lays a precious treasure of cargo bound for the Allied fighting front.

Maybe the cargo consists of fuel, or maybe of munitions, or then again of guns or tanks. But regardless of whatever it may consist, the cargo is essential to the army in the field awaiting its arrival.

We are in a new kind of war, different from any that has ever been fought before, and as a result new problems have arisen in conducting it. The greatest of these problems is the problem of supply. In fact, the whole success of our modern warfare lies in the solution of this problem of supply.

No wonder then that the skipper of that ship plowing bravely through the dark waters of the ocean stands so vigilantly at his post. On the delivery of his cargo may depend the success of a battle, the triumph of a tactical maneuver that may decide an entire campaign, and bring victory.

Has confidence in ship.

But the skipper's concern is not with his ship. Perhaps so has come from the yards of Henry J. Kaiser, whose modern construction methods have enabled thousands of his eager and sweating workmen to build out the most seaworthy ships in the world in a matter of mere days instead of months. The skipper is not worried about his crew. They are all trained and courageous sailors. And the skipper does not fear the sea. He knows its moods, its smells, its moods. He can handle it like a mother can handle her baby.

Why then his concern? Tonight, as every night, the skipper remains on the alert against the menace of the submarine, that silent and steel swordfish that prowls so stealthily in hidden waters, striking like lightning with a whip and then recoiling back into the sea again. What makes them so dangerous is that they cannot be seen. They can send out their torpedoes at a distance and then crawl quickly away.

Now shore, their effectiveness has been greatly reduced by the patrol bomber; against heavily escorted convoys, they must proceed cautiously; but out in the oceans and in thinly strung convoys, they are always dangerous.

thousands of miles away can be clearly seen. Not only must the ship be ready to receive the cargo, but our ship building must continue at its present unprecedented record.

With Henry J. Kaiser playing the dominant role in the construction of our ship building, our ship building must continue at its present unprecedented record.

In 1917, the submariners nearly won the war for Germany before Allied naval leaders perfected a defense against it. Today, Hitler makes no bones about the fact that the Axis depends upon the U-boat to cripple the Allied supply line and immobilize the vast number of United Nations soldiers poised on the major battle fronts.

The submarine is Hitler's last ace. Everywhere the Allies have sensed the initiative. After a period of preparation, American production has begun to turn out great quantities of equipment for its fighting men and those of the other United Nations. The war in Russia has made serious inroads on German manpower and placed the Reich numerically at a disadvantage with an Allied.

Again it is appropriate to remember that this is a new type of war, one depending upon the U-boat as once possible to maintain armies off of the land they occupied, modern tanks and the subsequent development of "blitz" tactics, of concentrating vast quantities of men and material for break through blows and the subsequent encircling movements, requires a steady flow of material.

Our experts have figured out that it takes 17 tons of shipping to carry one man to a fighting front and 4.4 tons of shipping to supply him for a year. Brig. Gen. R. W. Littlejohn, who commands the largest of American forces in the British Isles, estimates that 10.5 tons of shipping are needed to transport a soldier and 1.5 tons a month to supply him.

Specialists planning for the organization of an army of 7 1/2 million men, the magnitude of the problem of supplying them on fronts

day Evening Post concerning the Dutch fleet.

This is all that I think would interest the individual reader, if one would desire more information about the South or the air war, I will gladly tell them more of the life here.

Carl A. Fox.

I am quite sure that 3600 readers of the Advertiser will enjoy your letter this week. I am very sorry that I did not recognize you last November. You see, I have some 1600 subscribers to carry around in my mind, plus a score or more salesmen from Maine to California, and after all, the Army does a certain thing to you boys that really make you look different when you come back on a furlough.

As for the excitement you've had in the Army, it must really be a dull job for you. If you really want excitement and extra ordinary thrills, you should be with Neil Gebert or Richard Moore on Guadalcanal. Moore hasn't quite so many medals as some of the Army, but I'll bet you a dollar he has seen a helluva lot more Japs than you have.

Well, as for thrills and experiences, the folks back home aren't as lucky as you. The boys down at FRH aren't working 10-12 hours a day just because they want to. And as for myself, I'd think army life would be a vacation for Plymouth each week.

"Well," you might say, "look at he do you are making!" And to this I can truthfully reply that I had a month in army pay would seem like a fortune in comparison to what I get out of the Advertiser. Well, at any rate, Carl, whether you fellows in the States are struggling for what you fellows are supposed to be fighting for—FREEDOM. And if when the war is over, FREEDOM isn't restored to the United States, I'm afraid we'll have to start all over—right at the old Tea Party scene.

Yep, Carl, it's kinda hard for a fellow who is in the army, navy or marine corps to see the vast change which has come over our good old U. S. A. One of these days you'll probably see it with about seven millions other guys—but the only thing we hope is that you won't see it too late. I won't go into details this week—I'll do that later. But don't forget your Oath of Allegiance!

I'll try to do better in the future on the "Friday Day parade." We have so much to do each week until when it comes press time, what isn't simply has to go by the board.

Kinda like a farmer who lives nearby Plymouth. The other day he told me that if it wasn't for the AAA he could easily raise one hundred more hogs; and a busser man in Plymouth, who is supposed to be on the up and up—when it comes to his taxes he is a little shady; and then there are those who want to be fair with the government, but the government doesn't want to play that way. So, after all, being in the army, seeing the big shots—and I said SHOTS, is quite a lot of fun to a fellow who has a little sense of humor.

So when you're down in the dumps and feel that you have no thrills, just write us at the Old Advertiser, and we'll try and cheer you up. We can't do you job satisfactorily, then we'll write our Congressman, and from what we hear Washington can do a good job.

Yours for more thrills,
Tommy.

NEPHEW OF PLYMOUTHITES HAS THRILLING EXPERIENCE IN AFRICA

Robert O'Heron, son of Mr. and Mrs. J. G. O'Heron of Crestline and a nephew of Mrs. Minnie Watson, E. B. Curpen and Ott Curpen of Plymouth made his debut in this World War II the hard way.

A member of a crew of eight on a Flying Fortress commanded by Lt. Harry Dever of Martinsburg, Va., they left America for the holidays and flew without incident across the Atlantic and to the coast of Africa.

After landing in Africa they took one recent morning and formed up with other Fortresses for the last lap of their journey to war. They headed for the designated airfield at the front, where they were to report for action.

They flew all day, and when they arrived where they thought the field should be they couldn't find it. So they flew on and kept landing. The afternoon was over and dusk grew near. Suddenly, out of a blank sky, two fighters dived on them. Bullets began to spatter. That is how these youngsters, fresh from America, got off to a bad start.

They were able to identify themselves for the first time, as Devers speaks some French. The French officers put them to bed and arranged for a truck to take them to a meeting place with another American truck. Finally, at the end of the fifth day, they arrived at the airfield where they had hunted so desperately five nights before.

They were tired, but not in bad shape. They were still animated, and willingly told the story over and over to army officers. A good sleep was too much for them. The next morning they felt washed out and weary. Some of them were even sick at their stomach. But in a day or two they will be normal again, when their excitement over being alive quiets down a bit.

The above description was taken from an article by Ernie Fyfe, Roving reporter.

There are almost 30 billion stamps contained in the 150 million copies of War Station Book Two, or more than all the postage stamps produced by the government during the past 12 years.

They were alone in the air now and they headed back west and get away from the enemy. It was dark, and they still couldn't find the airfield to which they were being sent, so they flew far south to make sure of getting away from the mountains. They went up to 11,000 feet and flew until their gas was gone and then jumped.

Devers gave them all instructions before they jumped. They were flying south and he would be the last man out, so he would start walking north and all the others south. The plan worked. Eight of the nine found each other within half an hour. Lt. Conano landed in a gully a half mile away and spent the night there, rejoining the others next morning.

The first night they all slept on the ground, wrapped in their parachutes. They didn't know whether they were in enemy territory or not.

At dawn an old Arab came wandering past. He was a nomadic shepherd and he spoke neither English or French. But he was wonderful to those boys. He led them northward, and they walked all day, covering 20 miles. Again that night they slept in their chutes and almost froze.

The second morning they came across a caravan of 15 camels. In charge of them was an Arabian enlisted man in the French army. He was tending the desert buying camels for the French.

The Arabs took the boys along with him. They learned later that he thought they were Italian paratroopers and thought he was capturing them. They rode camels for two days—and they never wanted to see another camel. They had to ride bareback, and they say a camel's back would make an excellent razor blade.

They would ride till they could not bear it any longer and then get off and walk. But the sand was so deep they couldn't walk either, so they'd have to get back on their desert chariots.

For two days and nights they traveled by camelback across the bare sands. There were no trails, no roads. On the morning of the fourth day they came upon a French desert garrison and here they were able to identify themselves for the first time, as Devers speaks some French.

The French officers put them to bed and arranged for a truck to take them to a meeting place with another American truck. Finally, at the end of the fifth day, they arrived at the airfield where they had hunted so desperately five nights before.

LETTERS from the BOYS IN SERVICE

Feb. 5, 1943

Dear Tommy:

For quite a few months I have read of the exploits of the Plymouth boys, who are in the service. I must admit they write interesting letters. I have kept quiet for so many months that I doubt if anyone knows I am alive. I act as if I am not here, but when I was in your office last November. For those people that think I am one of the missing, I offer them this letter.

I have your Plymouth Advertiser every week since I have been in the service. My folks or friends send it to me every week. I also receive the college paper from Kent State University. This is the only means I have of knowing what takes place in Ohio. In the Advertiser, I read about the great exploits of the men just inducted into the army, navy and marine corps. It is interesting to note that some men take a certain delight in writing home immediately after they have been inducted into the army. They tell you that it is wonderful. I wonder why they have not written to you lately? It appears that a fellow takes pride in being a soldier, although he has stated definitely his plans for the army before his Uncle reached out his mighty large hand and had to drag him into the army. This is a phenomenon that is one I wished you would explain to me.

I consider myself as just another soldier in the eyes of the army and I hope to stay that way for the duration. Therefore, I will never have any exciting tales to bore you with in my letters. My experiences will not add a thing to my prestige, character or nurture. I have been in the army for about one year and I have met some interesting personalities during this time. I have seen generals than the average John Doe. There are a few in this category. Today, the Chief of General Bruce, A Major in the tank corps bought me a Coca-Cola last summer. We had a very interesting conversation about the army air corps. I have seen General Arnold. I had a birdseye view of General Marshall, attired in flying boots and a flying helmet, in a posture. I saw Captain Eddie Rick enbacher just before he took a long bath in the South Pacific. Even the great Clark Gable was here for a couple of days. I have lost some of his glamour now. I have talked to many sailors and soldiers that were at Pearl Harbor when the dirty little spot took a direct hit. I had a conversation with two sailor lads that were on the aircraft carrier Wasp just before it went down in the Solomons. I had dinner with a boy just article that was in England for ten months. I have seen several navy airplanes that have zero points on their fuselage signifying they have shot down several Japanese planes. I have seen reports that the most of the allied countries. I have not yet seen "Eleanor." I saw Colonel Elliott Roosevelt quite frequently last fall. This is as far as I have been able to get otherwise I have been leading a rather quiet life.

I have seen the much publicized "Zero Fighter." It is all they claim it is. Its maneuverability is amazing. I personally saw it climb vertically straight up for five thousand feet without stalling. It is so light that when one attempts to start its engine, the whole plane shakes like a bowl full of jelly. It is streamlined to the nth degree. It has no brakes on it.

I want to thank each and everyone that helped me through my hardships before I entered the army. I also thank those that have faithfully remembered me since I have been in the army. I have not seen anyone of the boys from Plymouth. A few of them are located close to me, but so far I have not been able to contact them. Scout Troop One Celebrates Its Fifth Anniversary Sunday

Approximately 60 Scouts, and their friends, wives, and parents, enjoyed a pot luck supper, celebrating the Fifth Anniversary of Troop One, Sunday evening in the High school auditorium.

During the evening, Luther Brown, troop committee chairman, made the annual report to the sponsoring institution, the Laymen of the Methodist church. The report was accepted by J. P. Moore, head of the organization, who also presented Mr. Brown with the Troop Charter and the Explorer Patrol Charter for 1943.

Mr. Brown, troop committee chairman, formally opening the court. Mr. J. B. Derr, warden of the Second Class, then awarded Russell Baker his second class badge.

J. P. Moore, warden of the Merit Badges awarded badges to the following boys: Paul Scott, bird study, hiking, pioneering, camping, cooking, reptile study; Gordon Sealhols, athletics, reptile study; Sid Thomas, fireman-ship, safety, hiking, mechanical drawing; Bill Derr, civics; Junior Davis, safety, personal health, reptile study, public health, and plumbing; Warren Wirth, handicraft; John Turoso, first aid.

Don Einsel, Jr., Scoutmaster of Troop One, presented Explorer awards of Scout Citizen to Sid Thomas, Warren Wirth and Paul Scott. First Honors as an Explorer Scout were also presented to Paul Scott, Sid Thomas and Junior Davis.

Mr. Floyd Dent, Johnny Appleseed Area executive, gave a very interesting and thorough talk on Scouting and its use in the home, church, school and in the present conflict. Stressed mainly was the living of the Scout Oath and Law as only a true Scout can and must do.

Mr. Dent also complimented the Scouts on their advancement and expressed the desire that he would like to have as many as possible attend the Area Court, Feb. 25, to witness the ceremony.

Star Badges were given James Moore and Junior Davis, and the higher rank of Life Scout was given to Sid Thomas, Bill Derr and Gordon Sealhols. These Scouts are to be congratulated on their work and it is our sincere hope that they will again appear before the Area Court of Honor.

The Scoutmaster then presented the first Five Year Veteran insignia that has ever been given in Troop One, to Willard Ross, Jr. We are very proud of the fact that Bill has thought enough of Scouting and its principles to have stayed with Troop One for this period of time and know that in the coming years it will always stand him in good stead wherever he might be.

The Court was officially closed by Mr. Brown.

War Works Hardships; Businesses Close Shop

The Enterprise-Review, weekly paper of Greenwich, suspended for the duration, according to an announcement carried in the Feb. 4th issue effective at once. Economic conditions, rising cost of production and loss of advertising revenue were given as the reasons.

A survey made of 1942 shows a loss of over 300 small weekly papers and the year 1943 will find a great many more closing their doors. While a newspaper is classified in the necessary industries, it is also necessary that its publisher make a living. It takes a heap of things to keep the country "Weekly Blast" going and with the rationing program closing in tighter and tighter, well, what do you think?

Restaurant Closes

This morning the Garden of Eatin', located at the intersection of routes 61 and 224 just north of Plymouth will close its doors, another victim of the war. Mr. and Mrs. A. P. Points of Plymouth have put in countless numbers of hours in giving the community an eating place to be proud of, but with the shortage of help, the inability to get necessary articles they expect to continue to carry out their plans of beautifying the grounds and making everything in readiness.

Meat Market Folds Up

Elyria's oldest meat market ceased business last Saturday because of the extreme shortage of meat, supplies all labor. The Tite Brothers Market found more than 75 years ago by John Tite, grandfather of Fred Tite, present owner.
