## MEN NEEDED AT SHELBY DEPOT

It takes thousands of hours to train an air pilot and the cost of his training is great. At the front when his ship is grounded for repairs because necessary parts are not available, each day of delay is a reproach to us here on the Home Front. One link in the chain supplying him with extra parts, when and where he needs them, is the Shelby Depot. The employees there can lift their heads in pride at the job they are doing. However, more male workers are needed.

Full information about these jobs can be obtained by seeing Mr. Paul Daugherty, who will be at the post office in Plymouth, on Saturday, July 1, from 11:45 to 12:30. Men already engaged in essential war activity are not eligible for these positions.

## TO MOVE TO CALIFORNIA

Mrs. Joe BeVier of Milwaukee, Wis., returned Monday for her home after visiting her mother in Shelby and Plymouth friends. Friday she was the guest of Miss Ida Cheeseman.

## Around the Square

(By Phineas Whittier)

PAUL ROOT arrived in town for a few days and he's been so busy I haven't had time to talk to him, but he'll probably have a good story to tell. After the many months he spent in the South west Pacific, he should!

IT'S NO WONDER that the nurses at the Willard hospital have given the title of "Doc" to Earl McQuate. The other day Earl received an ambulance call, and just one minute after reaching the hospital his patient gave birth to a baby. Good luck, Doc!!

IN the early morning and late afternoon Bill Hatch, George Hurst and Harry Whittier seem to do a good job in holding down the park benches around the Square. In fact, I think they're about the only ones left to do the job.

LIVING THE LIFE of Riley has always been a dream of mine. But Alle DeVore must have had the same idea and beat me to the draw. He came into town Monday after spending five weeks all by himself down at Gattos's Rocks, south of Mansfield. Alle's been doing a little fishing (one day only) and fox hunting. Yep, I love to listen to a bubbling brook...look into the blue heaven above...and enjoy nature in its fullness...but darn the mosquitoes!

THE FOURTH OF JULY is here and we're not ready for it! But there are some in Plymouth who will take Monday and Tuesday for the holiday, and others who haven't made up their mind! Just come on down Monday and see who is open or closed!

AND SPEAKING of the Fourth—Jud Morrison's all pointed up for it with new red, white and blue paint. The Sohio Station has just been given a new coat of paint which adds greatly to its appearance!

THE REPUBLICAN convention in Chicago was really a "hot one." At least the temperature was indicated it so. The high point was attained when the mercury climbed to a 100. But then at Springfield Tuesday the red went up to a 102.

WELL, IT'S Dewey and Bricker from now on. And I believe the Dems will have FDR and Wallace. The people, of course, will make their choice in November.

THE WAR with Germany will come to an end on Sept. 15th of this year, so predicts a very good prognosticator! We hope he is right, and if so, we'll tell you his name at that time!

DIDYA HEAR the one on Don Ford this week? Well, last Monday when the Scouts made the scrap drive, they came to Ford's house, and right on the front porch a five gallon jar of waste fat was ready to be collected, so thought the Scouts. But it turned out to be a nice big gallon of fresh milk which Ford had ordered. One of his friends had picked up! Any way the milk got into the scrap pile!

I DON'T think "Doc" Scoble has gained any relief from the heat by coming up from Florida! According to him, it's cooler there, and we are somewhat prone to believe him.

WHEN I ASKED "Willie" Ross, who is home on furlough from a Texas camp, "how is the cow country?" He merely replied he hadn't seen a cow since he's been in Texas! Funny how people get opinions, isn't it? If I were in Texas I'd expect to see a cow on every corner!

WELL, there's one thing the local farmers will have to admit! It has been exceptional hay-making weather this week. And the wheat and wheat are ripening. It won't be many days before the thrashers will be at work!

THE REASON A LOT OF PEOPLE do not recognize opportunity when they meet it is that it usually goes around wearing overalls and looking like hard work.

GOTTA GO NOW! Have to see a man about a cow!

## USED CARS TO BE UNDER CEILINGS

PRIVATE SALES INCLUDED IN PROGRAM; TRUCKS UNDER SEPARATE SET-UP.

Starting July 10, all used passenger cars will be brought under price control. All sellers—private individuals as well as dealers—come under the program. Specific dollar-and-cent prices at the levels of January, 1944, have been set up by model and body type for 23 makes and about 6,000 models of passenger cars manufactured from 1937 through 1942.

Two types of ceilings are given for each model and body type—"as is" price and a "warranty" price. Ceiling prices will drop at the rate of 4 per cent every six months, and separate prices are given for three geographical regions.

When a sale has been made the buyer and seller must jointly fill out a "transfer certificate." The buyer must file this certificate with his War Price and Rationing Board when he applies for his gasoline ration.

The new regulation does not apply to used trucks, which have been under a separate price regulation since April, 1943.

Township officials will be especially interested in the exhibition of fire-fighting equipment to be held at the river block west of the Deshler-Wallik hotel where conference headquarters will be located. From 4:00 to 5:00 o'clock Thursday afternoon two new township trucks will be put thru the paces, pumping water directly from the river for use on fires.

## THE OLD JUDGE SAYS...

"I can't think of anything else you'll need for your Victory garden, Judge... you've got pretty nearly everything."  
"I think so, too, John. Ever get your asparagus patch going?"  
"I gave that up last year, Judge. Tried it six years in a row with no luck. Just haven't got the right soil, I guess?"  
"Well, I think you're wise, John... no use keeping on trying things you know won't work. Just like prohibition. State-wide prohibition has been tried in this country

seventy-two times in the last ninety years. It has been adopted forty-seven times in the past thirty-three years and discarded everywhere except in three states. Same thing was tried in eight provinces in Canada and in Norway, Sweden, Finland and Russia but it was an admitted failure and universally abandoned.  
"The reason is prohibition does not prohibit. All you get is bootleg liquor instead of legal liquor, plus no end of crime and corruption."

## WYANDT FAMILY GATHER FOR 18TH REUNION

The eighteenth annual reunion of the descendants of Jacob Wyandt was held on Sunday, June 25, 1944 at the Mary Fate Park, Plymouth, Ohio. There were 31 members and two guests present. On account of the war and gasoline rationing, there were not as many present as at some previous meetings; quite a number of the younger generation being in the U. S. Service. The day was ideal, the park was shining and at an individual table the members partook of an excellent feast. At the business meeting, the secretary made the usual annual report. By proclamation, the officers were retained for another year; viz: Elmer Trauger, president and Anna Mae Smith, secretary and treasurer. The committee on time and place for the 1945 meeting reported the time as the last Sunday in June, 1945, and the place, Wooster, Ohio.

We are pleased to welcome to our number of members, Robert McIntire and family, who have come to Plymouth recently to make their home. There were present members from Medina, Creston, Wilmo, Shelby and Mansfield. At the present date the Jacob Wyandt family consists of representatives of six families, scattered over the U. S. from Rhode Island to Florida and California to the State of Washington.

Three families; viz: descendants of Joseph Wyandt, Leah Wyandt King and Elizabeth Wyandt Fenner, were represented at the reunion. Not represented, were the families of Daniel Wyandt, Sr., of Abilene, Kansas, Mary Wyandt Freese of Napoleon, Ohio, and Rachel Wyandt Stambaugh of Florida and North Dakota.

Those present at the affair were Albert Snyder, wife and daughter of Medina; Willard Smith and Anna Mae Smith of Creston; Effie Ricksecker and friend, Ethel Bash of Wilmo; Raymond Clark, wife and daughter Demaris of Mansfield; Mrs. Nora Clark and Kenneth Clark of Shelby.

## ROTTEN FRUIT SPREADS FAST

Promoters of government ownership of electric power production in the Pacific Northwest, as elsewhere, have enjoyed a measure of success because of their ability to picture the power controversy as a struggle between liberals carrying the general welfare standard, and the private power companies. The fundamental principle of private ownership of property, as contrasted to socialism, has been seldom discussed, apparently, in the belief that a little taint of socialism would benefit rather than hurt the country. But the farmers in the state of Washington are discovering something they should have known all along. Rotten fruit spreads fast.

For years Washington farm organizations have encouraged the bureaucratic growth of socialized electricity in their state, on the assumption that the government's Columbia River power projects would provide abundant cheap electricity and elaborate irrigation systems at the expense of the general taxpayer. But lo, the bureau are now reaching out to control farm markets and the farmers—in large areas in Washington, and the farmers don't like it. The Washington State Grange, loud supporter of socialized power, has gone on record as opposed to any schemes that might enable the national government to tell farmers when, what, and how to plant, and how much they would get for their toil. It does not mind putting the power company out of business as an independent individual. Why? Food is a lot more important than electricity. If the taxpayers must furnish the money to irrigate, and electrify the state of Washington for the farmers, why shouldn't the farmers of Washington produce food at cost for the taxpayers?

Yes! Rotten fruit spreads fast, and lost independence is the fruit of state socialism.

## INEVITABLE COST OF WAR

A cold comparison of figures, appearing in the United States News, shows that clothing, while declining in quality, has risen substantially in price since the beginning of war, notwithstanding price ceilings and a mountain of regulations. According to the News, manufacturers have found they can profitably stop making lower-priced items and switch to those with the higher ceilings. The lower quality of material and workmanship of the abandoned lower priced clothing can be found in the new and more expensive lines.

Cotton dresses that sold for \$9.95 before the war, now sell for \$12.95 and up. Good quality items of children's clothing, when available, are up 25 to 50 per cent. The rise in men's clothing has been less spectacular—up 10 or 15 per cent, but quality is down. And so it goes with practically everything the consumer buys.

Before the war, this country had developed the most efficient distribution system in the world. Every merchant, whether chain or independent, was on his toes to serve the public. He knew his existence depended on efficiency, reasonable prices and high-grade merchandise. If he sold food he sold good food. If he sold clothing, it had to be good clothing—for the money. That was the law of competition. And American merchants knew how to live by that law, just as did the manufacturers who supplied the merchants.

Our elaborate wartime system of production and distribution controls has proved it would be a poor substitute for the free competitive system in peacetime.

## PARADE TO THE FARM

During the past two years dozens of books have been written for the guidance of city people who are contemplating buying farms. Practically all of these books have had a chapter in the cities indicating a great increase in the number of people who want to break away from the rush of big business and live in the country.

Most of the books, which are written by men thoroughly experienced with farming, fortunately are not too encouraging about the prospects of a city man making good as a farmer. Most of them do not see the difficulties of farming, the knowledge necessary to be a farmer nor the small profit which even a good farmer can make from the soil.

But we doubt if these books are discouraging enough to prevent a greater and greater influx of city people to the country. Many business men have the idea that they are smarter than the average farmer—that what they don't know in knowledge about farming can be more than made up by efficient, modern methods of management plus information which they can quickly gather from up-to-date books.

To many, a farm appears as a form of retirement—an easy, comfortable, slow-moving existence. And no matter what farmers tell them to the contrary, they will not be convinced. The only way a stranger to the country can learn what farming is really like is the hard way. The present parade to the country probably will be followed a few years hence by an equally large parade back to the city.

## 1944 FIREWORKS

There won't be any fireworks to shoot off on the Fourth of July this year—no firecrackers, nor sky rockets nor even Roman candles.

That is, there won't be any fireworks in our country to celebrate our independence, but in Europe and all over the Pacific American boys will be shooting off the kind of fireworks that count most—fireworks which will not be a mere celebration but will be used to teach the enemies of our independence that we will and can defend it against all comers.

When we wake up on the morning of the Fourth it won't be to the usual accompaniment of tiny explosions set off by children. But the chances are that the Germans and Japs will be greeted on the Fourth, as they now are on every day in the week, by another mighty exhibition of pyrotechnics which will give them a long-lasting lesson about the sacredness of independence to the American people.

This year we are celebrating the 168th anniversary of that independence. Ordinarily the anniversaries which are remembered most are the ones coming in special years—such as the 150th or 200th. But the way things are going now, it appears as though the greatest anniversary of our independence in the history books of the future will be the 168th.

These boys register at the Agricultural Extension Office, in the basement of the Court House, Norwalk, and are placed with farmers who request their services. ## FARMERS CAN REDUCE COSTS IN USING JEEPS

Farmers of Richland county, many of whom have indicated through a national survey, of a desire to own a Jeep after the war, can save approximately \$1,694.78 for post-war rehabilitation if they take advantage of the scout car's four-sided personality, a recent survey reveals.

This figure is based on the difference between the estimated price of a post-war Jeep and the total cost of the four farm units which, according to extensive research and experimentation, it can replace.

Recent tests by accredited farm experts, including officials of the Department of Agriculture, reveal that the Jeep has a "great deal of farm blood in its mechanical veins," according to Ward M. Canady, president of the American Motorists, who said his company's engineers have proven "on the soil" that the scout car can be used as an effective four-purpose substitute for the horse, the tractor, the independent power unit and the light truck.

In the Department of Agriculture's report on its recent experiments with the vehicle, issued by E. B. Gray, head of the Farm Equipment and Research Division, the Jeep was described as "highly useful in plowing, harrowing and other field work."

First findings in the continuing Jeep studies being made by the agricultural engineering departments of Washington State College and Ohio State University demonstrate that the vehicle, in its present military form, serves many all-round purposes effectively, especially for the small farm.

**BEETLE TRAPS  
IN WILLARD**

John W. Baringer, chief of the Division of Plant Industry, announced today that the Ohio Department of Agriculture, co-operating with local officials and the U. S. Department of Agriculture, Bureau of Entomology and Plant Quarantine, will place a number of metal insect traps in Willard during the next few days to obtain information on the occurrence and status of the Japanese Beetle to aid in determining what control measures might be advisable.

Most of the traps will be placed in residential sections, and Mr. Baringer asks residents to co-operate by allowing the traps to be placed on their properties for a period of about 30 days. Traps function best when placed in sunny locations at least 15 feet away from host plants and residents are asked not to move the traps without first consulting the inspector.

The inspectors carry credentials which will be produced on request. Local police have been notified about the work.

The Japanese Beetle is an introduced plant pest. In the vicinity of New Jersey, it appears as an adult beetle about the middle of June and is most abundant and active during July and August. It is a voracious feeder, causing great damage to blossoms, fruit and foliage of many plants, including apple, peach, cherry, grape, corn, soybeans, elm, linden, rose and hollyhock. Soon after emergence female beetles begin depositing eggs in the soil. After the eggs hatch, the grubs feed on roots and grasses and other vegetation, causing considerable damage to turf in lawns and golf greens. The beetles overwinter as grubs in the ground.

# Bow Your Heads

**T**HIS is Invasion! Now in the hearts, brains and muscles of our American Youth lies the future of our country.

Bow your heads. Pray with millions of mothers the country over, as their hearts reach out over the seas, each one seeking out her boy, to protect him with the shield of her love.

Believe that in this world there is definite strength in decency and honor. Believe that in our devotion there is moral force. Believe that our *will* to victory will aid that victory.

Seek and ye shall find!

Let us seek added strength and fortitude for our men in our own sacrifice and devotion.

Let us focus every thought, every action, and every prayer on the boys fighting for us.

And, while each one bends to his task with ever-growing fervor and energy, let us adopt a common symbol as our faith in Victory.

Let that Symbol be War Bonds. Let us pour our money in a gigantic flood of goodwill toward our sons and brothers, as a spiritual shield for them.

This is the Invasion. The lives of our boys are at stake. Let them see that the Soul of America is with them.

# \$299.31 In 77 Days ABOVE MARKET Prices

That's the "VELVET" Mr. Raymond Lemmel got for his eggs between February 19 and May 5 this past Spring. And it was a short hatching season. In normal years it would have been nearly a third more. Keen operating, we think Raymond, and his Mother, Mrs. Gregg, have always done well with their chickens. Over the 77 day period they brought us 12,213 eggs for which we paid them \$585.82. Up to April 19th we paid 44c for hatching eggs and 40c the remainder of the season. We assumed the market price for that time averaged 26c.

These eggs were always clean, well shaped, chalk-white in color and large, weighing 24 to 30 cents per dozen. Of course such eggs produce larger chicks with maximum vitality. Congratulations, folks, on a profitable season.

Approximately 30,000 to 35,000 chicks were STARTED ON LARRO CHICK BUILDER this Spring within a 20 mile radius of Shiloh. At 12 weeks of age many of these pullet chicks will "graduate" to LARRO EGG MASH for the rest of their lives.

Watch your Chicks closely for Coccidiosis—it's the worst season in our recollection for this dread disease.

### TWIN CALVES

Charles Bixby who tenants the Leo Barnes farm wasn't quite sure a couple of weeks ago that "seeing is believing." Finding a new born Guernsey calf he returned the next morning to find it gone and in its place a new black calf. Investigation proved twin calves, the second set born on the farm within the past ten months. The first set were Guernseys born last Labor Day and the Guernsey and black on the 12 of this month. Now that's what you call stepping up production.

## IN MEMORIAM

In Memory of Sister Ella Traacker  
Who Died June 18, 1844

Death has again entered our Chapter Hall, and called to the Eternal Home a dearly beloved sister who has completed her faithful labors here in ministry to the cry of the Orphan, to the call of want and to the piteous wail of sorrow, and as a recompense has received the welcome plaudit "well done," from the Great Master.

And, Whereas, the loving Father has called our beloved and respected sister home, and she has been a true and faithful member of our Mystic Order, therefore be it

**RESOLVED**, that Plymouth Chapter, No. 231, Order Eastern Star, in testimony of its respect and love for the life she so well lived, do hereby enter into mourning for thirty days and that we tender to the family of our deceased sister our sincere condolences in their deep affliction and a copy of these resolutions be sent to the family.

"Over the hills and to the valley of endless years;  
O'er the road of woe to the land that free from tears;  
Up from the haunts of men to the place where angels are  
This is the road of mortality to the wonderful goal afar."

Virginia Eberly,  
Nellie Waddington,  
Ingeba Scott, Com.
