CHURCH SEKS NEW PASTOR

CELERYVILLE — Members of the Christian Reformed church are looking for a new pastor. Rev. J. C. Scholten, pastor since September, 1945, will leave May 23 to assume the pastorate of the 105-member Emanuel Christian Reformed church in Muskegon, Mich. He accepted the call after a long and pleasant ministry.

He asked, however, that he be permitted to complete catechism classes underway in the church school here.

Same Old Problems Confront Officials

The perennial problem of Spring, dogs and kids are again facing village officials and many complaints have been turned in against them.

"Spring," with its accompanying troubles seems to be the chief complaint. There is nothing much of us are so tired of winter that we welcome her with open arms. However, there is something that we do not like about spring that can be done about that. Over in Shelby the police department has been instructed to pick up dogs that are footloose, tags or no tags, will save them if found destroying lawns, flowers, shrubs and creating other nuisances. In Plymouth there is a village ordinance protecting property owners and this will be enforced to the full extent of the law.

Around the Square

JOHN STAMBAUGH, who purchased the old stone quarry site a few years ago, tells how he is starting work on the construction of his new home. Incidentally, Mr. Stambaugh pointed out that inasmuch as workmen will be on the premises, he will have to enforce a "no trespassing rule" at the quarry. Heretofore there are some who enjoyed fishing and the youngsters often take to the water. Mr. Stambaugh states he regrets to prohibit fishing and swimming, but to comply with certain safety measures, he is being forced to take this step.

L. B. ROBERTS stopped in the Celeryville area to see that the Childs' Saw Mill will continue to operate as usual. Mr. Roberts has been employed at the mill for more than five years, and at the death of Mr. Childs he took over the management of the mill. Most men past forty generally acquire a "bay window," but log rolling is an exception. The bay window for Bradley is as slim as a toothpick at — shall we say fifty?

Personal

DIDN'T MEAN to overlook Mr. Roberts' able associates at the mill — Harry Aumend and his son Forest. They've made an excellent record for a promising loggers, and keeping on the safe side of things, which give them a fine safety record.

AS A REMINDER don't overlook "Come With the Wind" which comes to the Plymouth Theatre next Monday for three days. The show which lasts for four hours, starts at 7:30 o'clock. The film has not been cut, and is being shown here at regular prices!

Personal

WE OWE P. H. Root an apology. Not that we stated he STARTED the recent brush fire near his home, but because he was out there with his fire extinguisher, it may have sounded a "spark" set ablaze the brush pile. However, I've been informed that youngsters were playing around in the brush pile, that started the blaze that called our "efficient" fire department out. Incidentally P. H. had the blaze put before this time. He was trying to do more than start the fire nor could be in anyway be implicated in same!

Personal

NOW DON'T ask me of "What do I think of the time change?" It doesn't make any difference. I was in the office practically all day, and I think that what we are trying to do is to save time. However, if we don't open up until 9:30, don't blame us!

IT WAS hard to tell which was working the faster, the farmers or the fruit tree blossoms—both were "putting forth" Tuesday afternoon and Wednesday, and now I realize that the countryside could be made to sound as if the were an air raid. . . but the tractors were it so."

Letters To the Editor

Dear Plymouth Parents:

What kind of a school do you want for your children? What kind of balance do you wish in your school? For some years now you have not had enough money to finance a new movie projector—at a cost of a few hundred dollars, which would benefit almost every one of your students; and yet you believe you can finance a football team at several times the cost, which would benefit perhaps a tenth of the pupils in your school.

You can finance that, but you can't buy decent desks for your teachers, nor adequate storing space for any class room, nor sufficient library books, nor a new building. New curtains, new stage settings are badly needed for your school and would benefit at least as many as a football team, but do you do anything about such things which would make your school more effective in every way, or do you just want entertainment for yourselves by supporting a football team to put on a show to stop some of your dull moments?

A portable blackboard has been another rather simple, but much in demand need for many of our classes; it would cost much less than a hundred dollars—Scientific equipment is sadly lacking

so that many makeshifts have to be resorted to by the science department. Do you care? Do you really want to educate only the physical side of people and then only say perhaps a fifth of the entire student body, or do you want a modern up-to-date school efficient in all its phases.

You can have pretty much what you want—if you work for it as well as wanting it.

COST 1941 = \$6³⁷

COST 1948 = \$9⁶⁰

INCREASE = \$3²³

or 51%

DOLLARS & SENSE

When a telephone pole cost \$6.37 in 1941 and \$9.60 in 1948, anyone can see the cost has increased \$3.23. When you examine the present cost of telephones, switchboards, cable, etc., and find a similar increase in prices, it becomes very clear that the cost of providing telephone service is increasing to an alarming extent. Knowing how highly this community values telephone service, we feel that you would want to be aware of our difficulties in operating today.

"It ain't fair!"

"There oughta be a law! Everything in our house runs by electricity—but this!" Poor Butch has to do things the hard way. Mother has cheap, dependable electric service to help her cook and clean, wash and iron and sew. Dad runs his razor, and his workshop, too, by electricity. The whole family enjoys light, comfort, and entertainment at the flip of a switch.

Never before has electricity done so much to make life comfortable—for so little! Yes, in spite of sharply rising production costs, the average family still gets twice as much electric service for its money as it got 20 years ago!

The skill and experience of our friends and neighbors in this company have combined to keep the price of electricity low—and its usefulness greater than ever before.

Listen to the Electric Hour—the Hours of Charm. Every Sunday, 5:30 P.M., EST, CBS.

Doings In Congress

By Congressman Wm. Lemke

Congress is busy appropriating billions of dollars for the army, the navy and the air force—national defense. This has become necessary because of the colossal blunders of FDR, Marshall and Truman at Teheran, Quebec, Yalta and Potsdam.

Then, there will be around \$8,000,000,000 or \$10,000,000,000 appropriated for foreign governments. This for armament and in an attempt to bribe the Reds. Our Uncle Sam is repeating the colossal blunder he made when he supplied Japan with scrap iron, some of which Hitler found its target in the bodies of your sons. Outside of sending some food to inefficient foreign governments, we are also arming governments that will be on the other side of the fence in case of war with Russia.

The time to call Russia's bluff has long been overdue. If that bluff had been called at Teheran, Yalta, and Potsdam, Russia would now be within her own borders and be a threat to the peace of the world. Army men tell me that World War III could still be avoided, if our President and the UN would call Russia's bluff, and tell her to get back into her own boundaries. Then, if there is to be any change of sovereignty or boundaries, it should only be made by a majority vote of those who are affected.

The food we send to these foreign governments is not given to the poor, but sold to those who have the money. The poor will starve just the same. Let the truth be known. Let us expose the One Worlders, the Wall Street and the International Manufacturers and Bankers those who profit by the Marshall Plan. You, who pay the billions in taxes have a right to know the facts.

These billions appropriated will be extracted from the American people—rich or poor. When you eat a hotdog sandwich, you eat and pay 73 hidden taxes. When you buy a pair of shoes, you wear and pay 126 hidden taxes. When you buy a bar of soap to wash with, you pay 154 hidden taxes. When a farmer buys a pair of overalls for farm work, he pays 148 hidden taxes. When the housewife buys a cotton dress, she wears and pays 125 hidden taxes, and last, but not least, when you eat a loaf of bread, you eat 52 hidden taxes. So we could go on indefinitely.

Our Uncle Sam, because of his generosity and stupidity, has become our most burdensome de-

From where I sit... by Joe Marsh
Homer Does Some "Back-Seat Sewing!"
Homer Bentley's missus was working on her new sewing machine, when Homer comes in, draws up a chair, and starts talking: "Don't you think you're running too fast?" he says. "Slow down! Watch out! Be careful!"
When the missus finally turns with murder in her eyes, Homer says goodnaturedly: "I thought you might like a little help, dear—like you help me drive the car!"
The missus can't help but burst out laughing—and they settle what might have been a quarrel over a friendly glass of beer. The missus agrees to give up back-seat driving and nagging Homer about ashes on the rug. Homer agrees to quit criticizing Sarah's taste for flowery hats and parsley salad.
From where I sit, the key to getting on together is meeting every issue half way—and overlooking any petty differences in tastes—whether these tastes apply to beer or flowery-looking hats!
