Seven other children, Marjion K., Toledo; Ada L. Shaffer, Shelby; Frankie C. Mott, Steuben; Orville E., San Antonio, Tex.; Rosemary J. Rothhaar, Carrothers; Twyla Wertz Republic route 2, and Maurice A. Sandusky, also survive. There are also a brother, Alva J., Bloomville, and a sister, Rosa E. Hager, Moline, and 16 grandchildren.

Sir: Due to the lack of interest of the young people and for other reasons, the organization known as Teen Town, U. S. A., will close Jan. 1, 1961.

One of the major contributing factors bringing about this action is the diminishing concern of many adults regarding Plymouth and our young people.

Since April, 1958, for two years and eight months under the sponsorship of a few interested adults, this non-profit youth organization has provided good, clean recreation for the young people of Plymouth and the surrounding area. All activities were well disciplined. Many of the good young people are justly proud of their accomplishments. The local schools, the village, many worthy organizations, charities and others have benefited by their considerations. Complete records of receipts and expenditures are available to any interested party or parties.

Recently certain adults acting like juvenile delinquents and certain young people acting like hoodlums have conspired to create disturbances and hinder the smooth operation of the organization.

Even the Christmas lights were stolen from the tree in front of the building. Botten tomatoes have been thrown. Malicious and vicious slanderous reports have been circulated.

Some good out-of-town people no longer let their children come to Plymouth because of these reports and the recent turn of events. Even some Plymouth parents do not want their children up-town.

It was even suggested we dim our lights and ease up on our discipline to continue.

We, as sponsors, want to take this opportunity to sincerely thank the many fine young people and adults for their contributions and understanding. The organization will not be completely disbanded. The assets of the organization will be disposed of at the discretion of the board of directors composed of Plymouth teen-agers.

Very truly yours,  
 Thelma and Don Shaver

# ASK THIS FAMILY ABOUT NATURAL GAS.

## ASK MARTHA, HOUSEWIFE, AT HOME...

This family knows about natural gas. Ask Martha, mother and housewife. Gas heats and air conditions her home. She cooks with gas. Her family has a gas refrigerator and a gas incinerator. Gas helps her with her laundry by heating water and drying clothes.

Like hundreds of thousands of other Ohio homemakers, Martha relies on dependable natural gas that is available in this area in abundant quantities — at rates that are among the lowest in the nation.

Gas does it better — for less!

by Frances Resnick Korman

Watching seeing eye dogs guide their masters and mistresses safely and expertly on their daily rounds is an inspiring sight. While such dogs are highly trained for their world they can... like humans... be distracted and a distraction at a critical moment can be disastrous. It is therefore important for the public to observe a code of behavior towards any guide dogs they meet.

Much as you love all dogs and much as you are tempted to pet the Seeing Eye fellow and let

him know how much you admire him... don't. You'll be disrupting the mutual understanding between dog and master which is essential at all times to safe and efficient work.

Never offer food of any kind to the guide dog. Not only does it distract him, but his health is of great importance to his blind master, and it can easily be upset by indiscriminate feeding.

Never grasp the arm, shout directions, to a blind person working with a guide dog. This, too, serves to disrupt the proper relationship between master and dog and may be likened to putting one's hand over the eyes of a person driving a car.

Never permit your leashed dog close to a guide dog. Although guide dogs are taught to ignore all other animals while in harness, your pet may offer a distraction.

Never interfere with a blind person who is correcting his dog, either verbally or through a quick tug on the leash. Dogs, like humans, can be distracted from their primary duties and corrections are as necessary to recall the dog's attention as praise or patting to reward him for work well done.

## Will price of hunting be raised?

The move to raise the cost of hunting licenses is under way. Ohio Department of Natural Resources' division of wild-fauna.

life calls attention to some. Although Ohio in 1959 stood fifth among the states in total hunting licenses, tags, permits and stamps issued, its income was exceeded by 12 others with lower totals.

"This means just one thing—these states are obtaining a much higher price for licenses sold," said Hayden W. Olds, chief, Ohio division of wildlife. He was analyzing the recent figures released by the U. S. Fish and Wildlife service.

Ohio sold 739,213 licenses, obtaining an income of \$1,147,329.

"By contrast," said Olds, "Wisconsin sold 10,000 fewer—729,804—but received \$2,904,782. Illinois with 552,000 licenses, realized \$1,938,000. Missouri received \$1,487,403.65 for 325,000 fewer than the Buckeye state. Even more of a contrast is evident when you see that North Dakota, putting out 196,000 licenses, got back \$1,220,000."

Olds then called attention to the figures for the four states which sold more licenses than Ohio—Pennsylvania, California, Michigan and New York. "Pennsylvania sold twice as many," said Olds, "but its income was three times that of Ohio. Michigan put out 1,204,000 as compared to Ohio's 739,213, but collected more than \$5 million. California received \$3,641,000 for 1,272,000 licenses, while New York got \$2,632,000 for 1,048,000."

The wildlife chief then declared that a slight downward trend in Ohio hunting licenses sales in 1958 was followed by a decrease of 15,000 the following year. As of October 31 last, sales were running about the same as for 1959, but Olds stated "indications of light hunting pressure in many parts of the state are being interpreted that a further drop will be experienced."

**LAKE ERIE PERCH ANGLERS**, who have had phenomenal fishing in recent years, may expect even better luck next autumn, if severe mortality of some kind does not drastically reduce yellow perch numbers in the meantime," says Charles Selden, Division of Wildlife at Sandusky.

Fish Management supervisor Annual fall research investigations revealed that perch hatched during the spring of 1959 are extremely abundant.

"This age class is about seven inches long and about 50 per cent are mature now," declares Selden. "Most of them will spawn next spring, and by eight and one-half inches long, September will be eight to 10." "This means plenty of good fishing in store for anglers."

## Angler, throw those worms overboard

Lake Erie fishermen, hear this!

Cast away (no pun intended) those night crawlers, soft craws, doughballs, sooper-doooper wiggling-wonder lures and the like. What you need to swell that creel is a bait box stocked with water fleas.

And a few copepods, amphipods and tenebrionidae might help, too.

At least, this seems to be one of the many conclusions which can be drawn from the results of a research study on the food habits of Lake Erie fish recently completed by an Ohio State university zoologist.

Conducted by Dr. John W. Price, professor in the department of zoology and entomology, and a team of research assistants working in the university's Franz T. Stone laboratory at Put-In-Bay, the study dealt with the analyses of the stomach contents of over 14,000 specimens of 10 important species of Lake Erie fish.

**COLLECTING OVER AN** eight-month period, fish used in the study included 2,450 specimens of yellow perch, 2,375 trout perch, 2,327 smelt, 1,951 spottail shiner, 1,945 sheepshead, 1,296 white bass, 822 channel catfish, 666 alewife, 361 walleye and 225 gizzard shad.

The zoologists found that five items — cladocera (often known as water fleas), copepods and amphipods (other small crustaceans), aquatic insects and other fish — make up the principal diet of the 10 species.

A total of only 14 major groups of food organisms were recovered from all the stomachs inspected.

A cooperative project sponsored by the Ohio Division of Wildlife and the U. S. Fish and Wildlife Service under contract with Ohio State's Research Foundation, the study was set up to establish a basis for determining degrees of selective feeding by fish in relation to abundance and nature of their food supply.

The average weekend fisherman, who spends half a day chasing some catfish back and forth across a lake, may find a few of the zoologists' findings a bit difficult to believe.

For instance, Dr. Price's report shows that channel catfish will eat almost anything, at almost any place, at almost anytime.

Analysis of the catfish stomachs' contents revealed that the specimens had consumed five different genera of leeches, six genera of fishes, several genera of mollusks, an extensive list of insects, various crustacea, a spider, a feather and a tip-end of a juniper branch.

In addition, the study shows that catfish fed on the bottom, at the surface and at levels in between. Evidence also suggested that they ate day and night.

Now being prepared for publication by the Ohio Biological Survey, Dr. Price's report emphasizes the importance of the minute cladocera in the diets of the fish studied.

# Christmas

**W**e have our songs about that mighty night when the angels' voices shook the world and the light was bright over Bethlehem and the morning stars sang together in their joy. And these are our carols of Christmas . . .

We have our Yuletide memories:—a sprig of holly, a loved one's kiss, a friend's greeting, and white snow falling softly on the roof-tops of an old, old town . . .

And these are our symbols of Christmas . . .

We have our stories of that night before the first Christmas when the silent little group stood in the shadows of the inn and the shepherds stood quietly with their flocks and the wise men pressed fast towards the East to pay homage to a small Son born in Bethlehem.

And this is our Christmas story . . .

Yet who of us knows Christmas until he has seen the love and wonder in the eyes of a child as he read the little story of the Christ-Child's birth on that bright and wonderful night so long ago?

Seeing that, we know we can base in them our hopes for peace on earth; goodwill towards men that rang from the heavens on the first Christmas, and it is in them that we can place our faith for that future even as another Mother placed her faith in the small Son born to her that night.

And it is with the simple words of a child that your church brings its Christmas message to your home today—"God bless us, every one . . ."

Glory to God in the Highest, and on earth peace, goodwill toward men.

# Red whips Colonel Crawford; Daupmen seize lead in RCL

Don't look now, but Coach Harold Daup may have the makings of a champion team. Despite a weak shooting record, the Big Red showed it could cope with height on its home floor Saturday by swamping Colonel Crawford, 57 to 41.

Plymouth scored only 26 of 63 tries from the floor and only five of 11 penalty tosses. But it was more than enough, after a shaky first period, at the close of which the visitors led, 11 to 8.

Jim Russell, big gun for the Red, rapped home 17 points to lead both teams. Jerry Daron had 12 and Ray Lynch 11 for the winners.

Bill Clary dumped 12 for the Crawford quintet.

Plymouth Jayvees took their

defeat of the season, 54 to 33.

## Cok nets 18 as Jays fall in loop contest

The roundball fraternity saw a walkaway in the Sandusky street gymnasium Friday night.

Plymouth's Big Red steamed to an easy 62 to 38 victory over Bellville in a Richland county league contest. It was the third straight in the loop for the winners.

Plymouth jumped off to a 12 to 4 lead in the slow first per-

iod, swelled it to 30 to 14 at the half and won going away. Big Marv Cok came into his own as a scorer for the Big Red in this one. He bagged six field goals and six penalty shots for 18 points. Jim Russell fell away from his average with an 11-point effort, but he did not play the full game.

Dan Gensen was high for the Jays with 14.

Plymouth Jayvees walloped the Bellville outfit, 45 to 29.
